

Protect Your Child, Protect Your Family

COVID-19
VACCINE

Primary Series

The CDC recommends the Pfizer-BioNTech COVID-19 vaccine for children ages 5-17. The primary series is 2 doses 3 weeks apart, just like yours.

Third Shot

Immunocompromised children ages 5-17 should get a third dose of the Pfizer-BioNTech COVID-19 vaccine at least 28 days after their second dose.

Booster Dose

Teens age 12-17 should also get a booster dose 5 months after the primary vaccine series. Right now, booster doses have not been approved for children age 5-11.
